appzen

AppZen Expense Audit

Audit 100% of your expenses instantly with powerful AI software

Improve finance decisions

Improve decisions with insights and benchmarks to enhance your policies, audit processes, and reporting.

Automate policy compliance

Automate your unique policies, manage exceptions, and use data lookups to automate decision making.
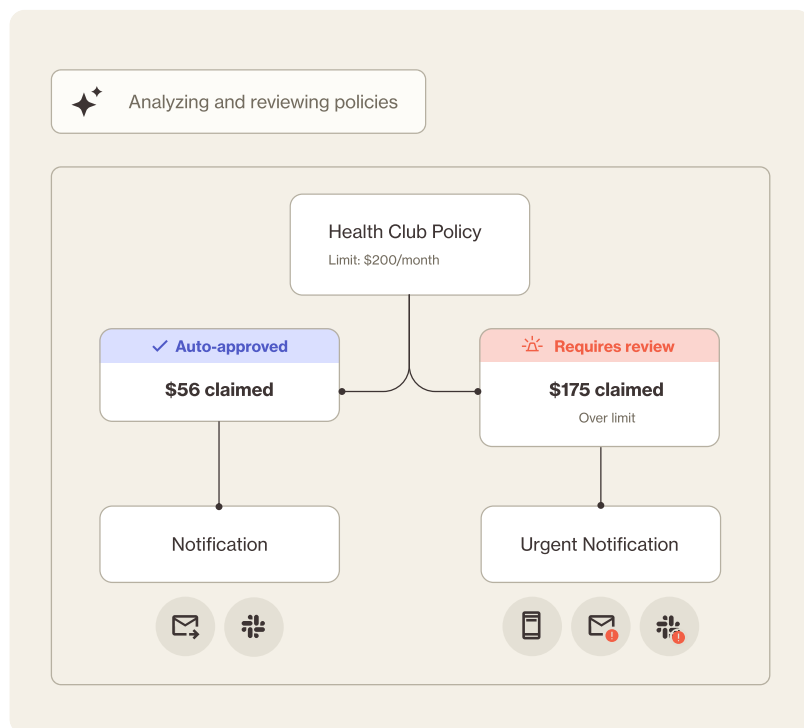

Decrease finance workload

Based on your policies, auto-approve low-risk spend, erase complexity, and pay employees quickly.

Eliminate unnecessary spend

Find errors, waste, and fraud before you pay.

AppZen provides better expense outcomes

- Prevent 2%-5%+ excess spend before you pay

- Detect 5-10 times more high-risk transactions, up to 10% of total transactions

- Find expense, invoice, and P-Card duplicates in under 30 mins.

- Reduce effort by 90%; focus on high-risk areas

- Reduce issue-to-action time by up to 80%

- Mitigate global spend risk by overlaying translations from 90+ languages atop receipt images

- Benchmark against peers; improve compliance and spend

With AppZen, we were able to identify immediate savings opportunities that we reinvested back into the business.

HEAD OF THIRD-PARTY RISK MANAGEMENT
GLOBAL FINANCE SOFTWARE COMPANY

AI-powered Expense Audit: A 24x7 automated finance expert

AppZen AppStore

Quickly deploy apps from our AppStore to extend your reach to new expense types and policies, such as online gifts or sales tax

Custom AI models and workflows

Automate your organization's unique policies and processes with custom AI and tailoring of automation rules

Manager-specific and custom dashboards

Enable front-line managers to correct the behavior of the 5% of employees that cause 90% of the expense risk. Quickly build custom dashboards.

Expense Audit - Features

AI understanding of unstructured data on receipt lines

Extract, read, and understand the content and context of every receipt line, including unstructured descriptions, such as hotel upgrades

Line level, receipt-to-claim matching

Match receipt lines against expense claim lines; identify miscategorized and overstated expenses on claims, such as tips

1000s of online intelligence sources

Enrich with intelligence from 1000s of online sources to capture data on dual-use merchants, average restaurant check sizes, and more

FCPA, SDN, and HCP compliance

Prepayment compliance with anti-bribery, FCPA, SDN, and Sunshine Act; identify HCPs in receipts and use US NPI registry

Case management

Queue management based on violation types, employee groups, policies, and countries

Superior knowledge and support

A single point of contact, access to our technology team, 1-hour response time and hourly updates on urgent issues, and fewer false positives

17 AI models deliver best practice auditing
