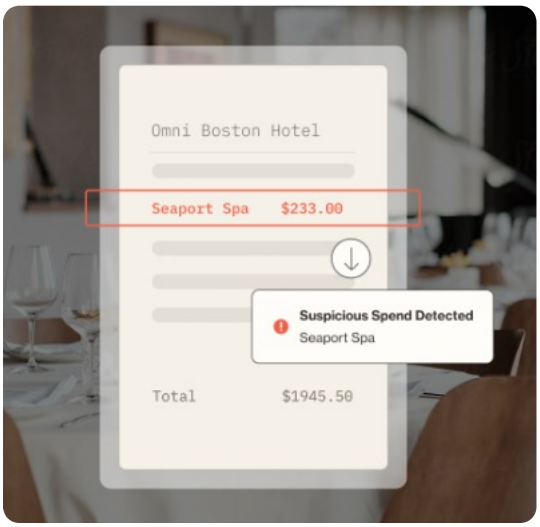
AppZen Expense Audit

Audit 100% of your expenses autonomously with AI Agents.



100%

Prepayment audit

Our AI detects duplicates, errors, waste, and fraud before reimbursement.

90%

Work reduction

AI Agents automate policies and processes, ensuring compliance with FCPA, HCP, and fapiao regulations.

10x

More risk detected

Tune policies and help managers identify high-risk spend behavior with AI Analytics data.

42

Languages supported

Scale globally with AI that autonomously processes expenses with complex VAT requirements.

Combine with AppZen Card Audit and review at the speed of spend

Maximize compliance with full visibility into corporate card spend as transactions post. Our platform automatically ingests Level 2 and 3 data. AI audits 100% of activity for violations.

AppZen Autonomous AP

Automate your invoice lifecycle with AI Agents, from data capture and PO matching to OK-to-pay.

80%

AP efficiency gain

Autonomously capture, validate, and code invoices and e-invoices globally in 40+ languages without templates.

1 day

Invoice cycle time

Our AI delivers touchless PO matching, GL coding, and approval routing based on your business rules.

80%

Autonomous spend processing

Our agentic AI learns your workflows and adapts as your business and volumes grow.

1% to 5%

Spend reduction

AI Agents identify duplicates and spend leaks, so teams scale without adding headcount.

Add AppZen AP Inbox Service Center for end-to-end AP automation

Reduce email processing time by 60% and save over 25 hours weekly per team member. AI Agents automate ticketing workflows and replies to vendor inquiries.

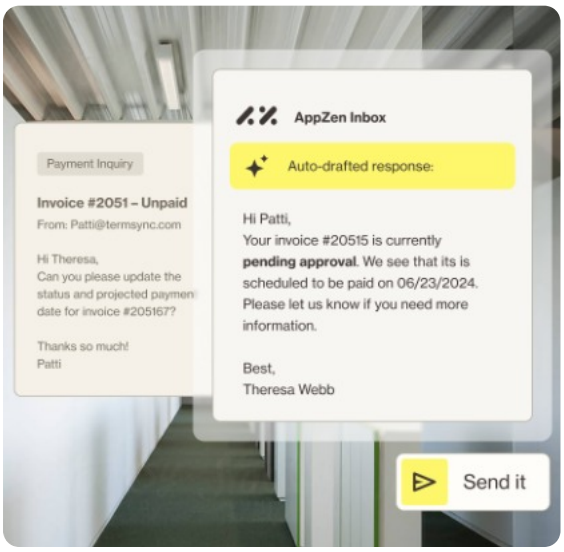
The agentic AI platform for today's finance team

Turn complex standard operating procedures into agentic automations in minutes.



50%

OpEx reduction

AI Agents reduce manual work, for instant scaling without adding headcount.

8 min

To an AI Agent

Upload your SOPs or create Agents from best-practice instructions with help from an AI assistant.

100%

Auditable decisions

Every action is logged in real time and all Agents are governed 24/7, with operational guardrails.

0

Code required

Create Agents using plain English or existing SOPs, without dependency on IT teams.

Real AI Agents, built for T&E and AP teams

Finance team workflows are filled with repetitive, rules-based decisions that are time-consuming to handle manually. AI Agents automate those decisions without writing code or waiting on IT.

Expense Audit Agents

Agents autonomously review, decide, and act on AI-flagged high-risk lines to auto-approve, auto-reject, or escalate based on your logic.

Autonomous AP Agents

Agents answer vendor queries, match and code invoices, and resolve exceptions in real time to drive a touchless invoice lifecycle.

AI Agent use cases

For T&E teams

Problem:

Starlink was a valid merchant but wasn't yet in the preferred supplier list, triggering constant high-risk flags and a manual review backlog.

Agentic solution:

In 8 minutes, the team built an AI Agent to verify and auto-approve these Starlink expenses. Clearing these false positives automatically raised auditor efficiency and led to a 50% OpEx reduction without compromising compliance.

For accounts payable teams

Problem:

The team lost hours each week to manual work caused by misaligned units of measure between supplier invoices and POs, causing significant PO match failures.

Agentic solution:

The team developed an AI Agent to interpret and convert units of measure between invoices and POs. By automatically validating matches, the Agent achieves touchless PO match reconciliation, eliminating manual intervention.
